CONCEPT DRAFT JUNGLE BLISS VILLAS

This concept designed with an open area at the front of the villa, with expansive doors and windows for a clear view of the front.

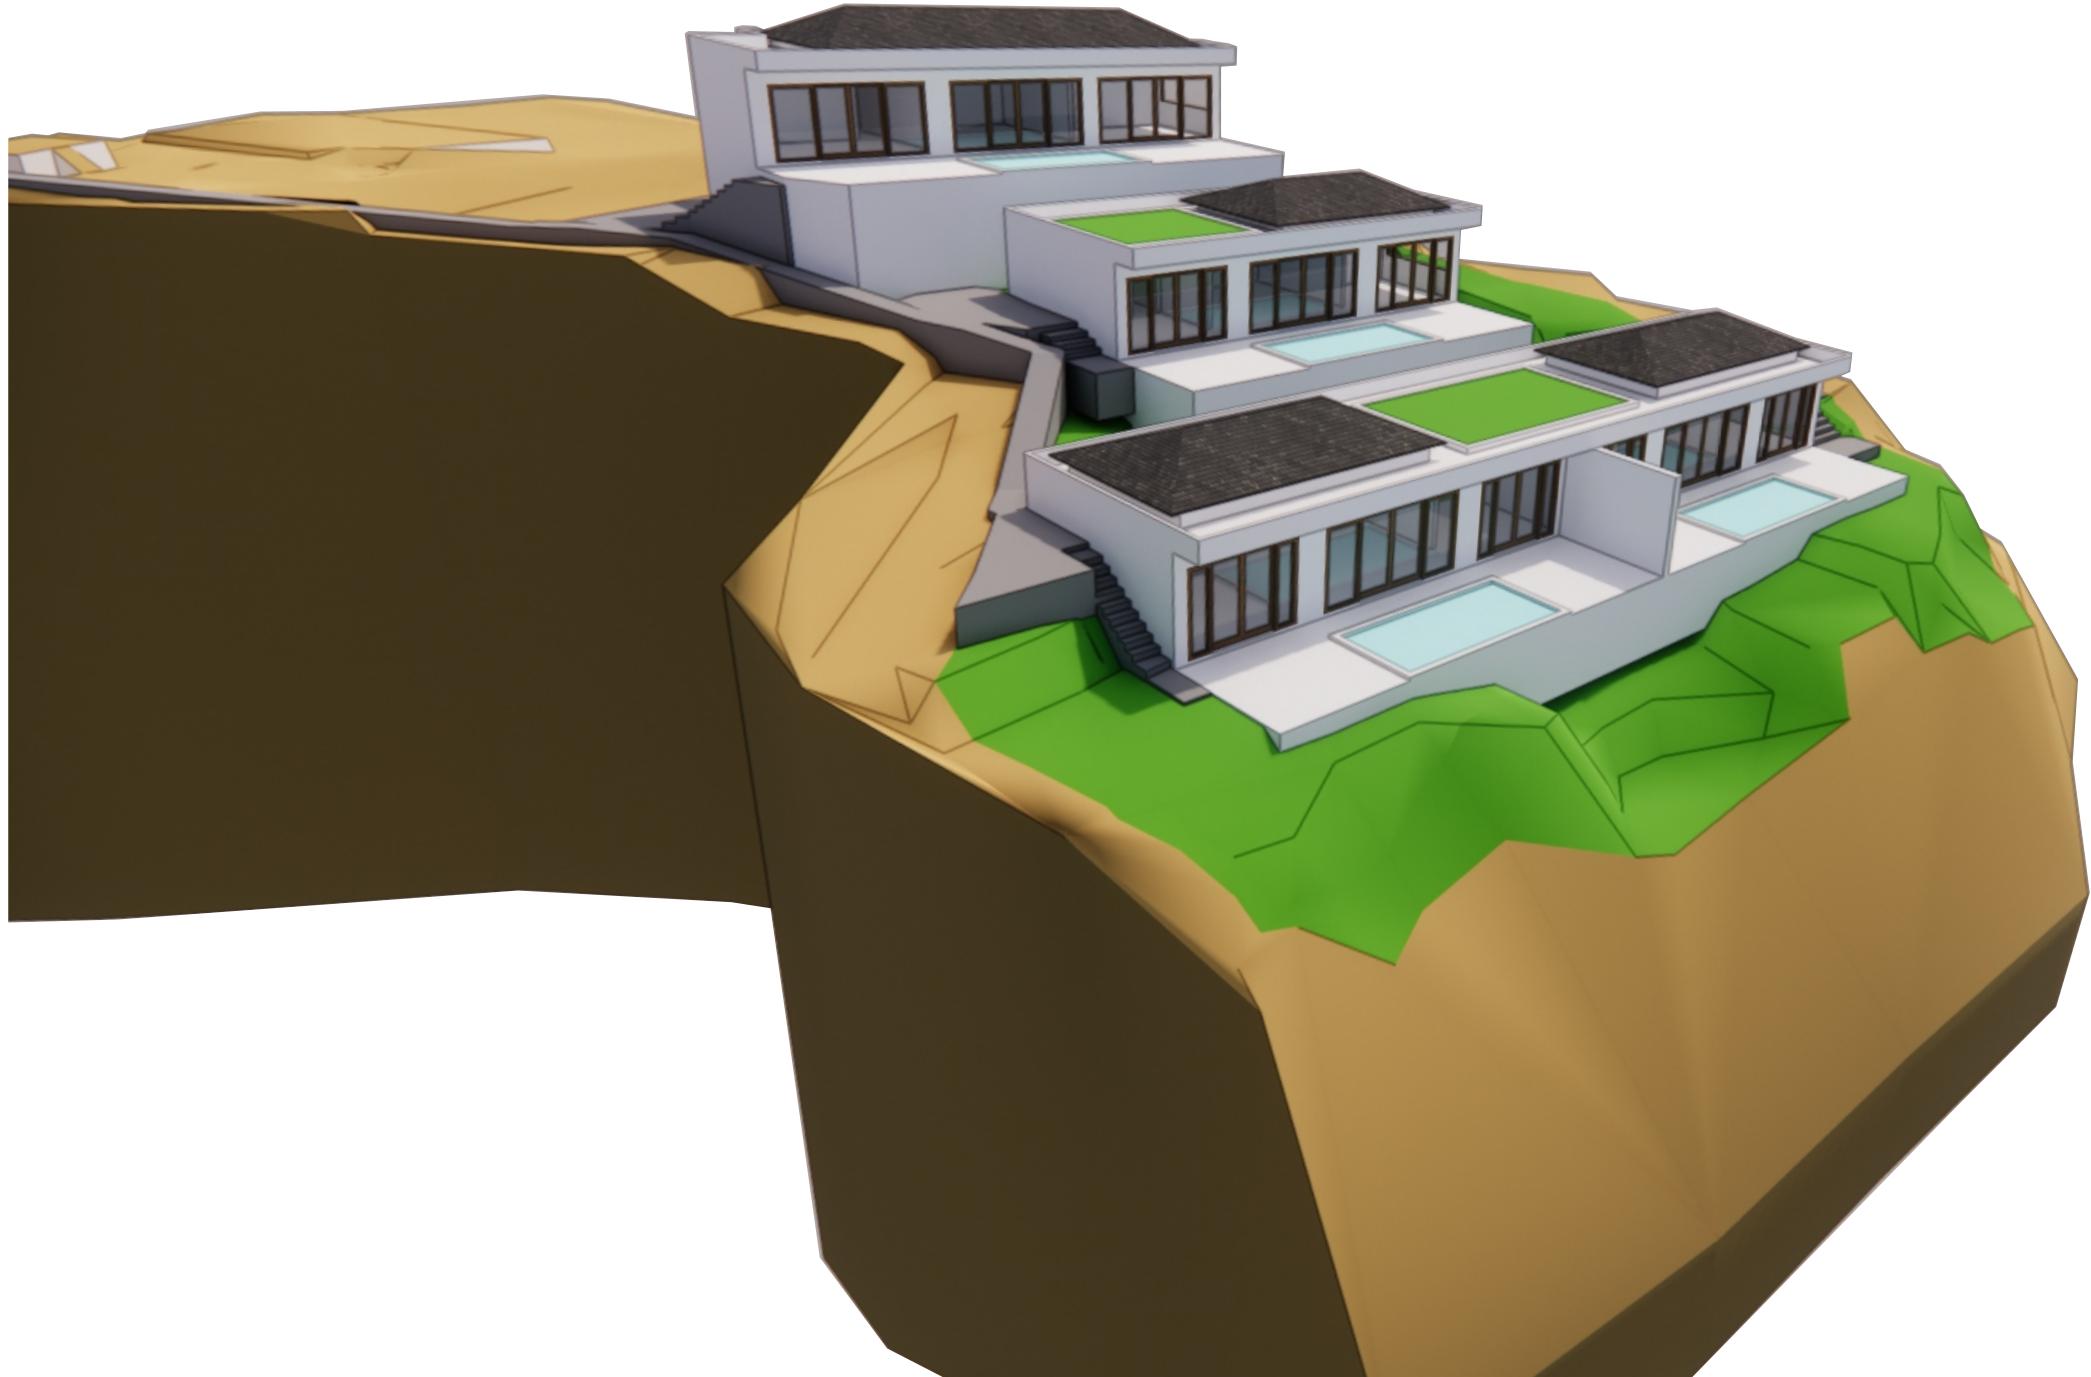

The villa's design also follows the contours of the original land level, allowing each villa to have an unobstructed view of the surrounding villas.

The roof is positioned on the side of the villa to avoid obstructing the front view.

A rooftop garden is also provided to create a natural feel and camouflage the concrete, preventing it from appearing harsh and boring.
